Before you plan your trip!
CHECK THE ENTRANCE REQUIREMENTS
FOR THE COUNTRY YOU NEED TO ENTER

Please note:
This diagram assumes you are not a resident of an EU Member State or Norway or Switzerland. For residents of those countries who were nevertheless vaccinated in UK (or elsewhere in the world) different rules apply!

Systems allowing residents of  vaccinated elsewhere to gain EU Digital COVID Passes are known. For residents of  follow the same route as for visitors!

Were you fully vaccinated in Northern Ireland, and hold an Irish passport?

Yes

No
I am fully vaccinated in England, Wales or Scotland, or in Northern Ireland & don't hold an Irish passport

Use the Irish Government's third country portal to obtain an EU Digital COVID Pass:
<https://bit.ly/Ireland3rdCountry>

Where are you travelling?

Greece 
Ireland 
Italy 
Belgium 
Norway 

France 

Germany 

Anywhere else in  or Switzerland 

All you need is your UK NHS QR Code in a digital format - this can be in a NHS App, as a PDF file on your phone, or even in the French TousAntiCovid App

Are you travelling to any countries *other than*  afterwards?

UK NHS QR codes **do not** work in German apps, but pharmacies can issue you a EU Digital COVID Pass based on UK issued vaccine proofs (letters)

NHS QR codes do not work in these countries at the moment - but NHS confirmation letters *might* be enough to get you into the country - check it!

Find the app for the country you're visiting here
<https://bit.ly/QRcodeVerifyApps>
and test the verification works!
For  it should work!

No

Yes

Go and find a friendly pharmacy, and ask them to issue the EU Digital COVID Pass

If you nevertheless want to test is, check your QR code with the relevant verifier app listed here
<https://bit.ly/QRcodeVerifyApps>

It doesn't verify

It verifies!

Download the TousAntiCovid App, and scan your NHS Vaccination QR Code with this

Pharmacies in  can still issue non-residents a EU Digital COVID Pass - if you plan to travel elsewhere ask at a pharmacy to get one!

You might have to ask a few before you find one
Seems to work better at pharmacies not at railway stations or airports!

Take paper proofs with you, but in a country that is strict about proofs of vaccination you might experience some disruption!

There have been some reports of problems, esp. with  and Northern Ireland issued codes
Ask on Twitter for help!

Everything works!

When in France, venues will check your code with the TousAntiCovid Verif App

Everything works!

Everything works!
