High resolution PDFs and PNGs, XML, and ODS files of calculations all at:
<https://jonworth.eu/nextprimeminister/>

All errors are Jon's, and Jon's alone.
 Based on voting data as far as we know it, public statements from possible candidates, and a fair amount of educated guessing. Use this diagram at your own risk! Do not use it to bet or to plan who should be the next prime minister!

Probabilities shown in orange - at each node, on arrows, and summed at the end. Width of lines corresponds to accumulated probability.

Diagram made with the free tool **draw.io**

These probabilities are repeated here
